DETAILED ACTION

1. Receipt of the November 29, 2004 Amendment/Response is acknowledged. Claims 10-26 and 62-65 are pending and are presented to be examined upon their merits.

Specification

2. Claims 19 and 21 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The limitation of "competes" is not further limiting the parent claim of "cooperates"

Claim Rejections - 35 USC § 112

- 3. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 4. Claims 18-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In particular, claims 18, 20 and 22 uses the word "cooperates" with respect to a team, bidding group or a bidding community. In what way is the one group cooperating with the other? It is not clear what is the basis of the cooperation.

Art Unit: 3624

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 6. Claims 10-15, 23 and 26 rejected under 35 U.S.C. 102(b) as being anticipated by Brown (US 5,794, 219).

Brown discloses a product for a team auction system comprising: instructions for directing a processing device (see figs. 7-10) – Claims 10

Partition participants into teams [110, 66], wherein a team comprises team members (38) (see col. 6, ll. 53 to col. 8, ll. 59)- Claims 10

Determine a team bid and aggregating bids of team members (see col. 6 ll. 65 to col. 7. ll. 5; and col. 8, ll. 4-18)-Claims 10, 11, 12, 14, 26

Determine a winning team based on said team bid allocate items to said team (see col. 8, ll. 36-46) -Claims 10, 13, 23

A media readable by said processing device that stores said instructions (see col. 6, ll. 41+)- Claim 10

A participant chooses a team at the beginning of the team auction (see col. 6, 1l. 25-40)
Claim 15

Application/Control Number: 09/885,720

Art Unit: 3624

Partitioning at least one participant based on an interest of said at least one participant

Partitioning at least one participant based on a predetermined process for partitioning said at least one participant

Claim Rejections - 35 USC § 103

- 7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 8. Claims 16-22 and 62-65 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brown (US 5,794, 219) in view of Walker et al (5,862,223). The teachings of Brown have been discussed above.

Brown fails to disclose proceeding to at least one additional round. Walker discloses an auctioning embodiment where the end users create request and submit them to a central controller. The request are submitted to a pool of bidders which bid over a number of rounds (see Walker col. 38, ll. 12+). It would have been obvious for an artisan at the time of the invention of Brown to recognize the advantages of the multi-round auction to provide the bidders with a more than only one shot to a particular acquire good and/or service. Thus an artisan at the

Application/Control Number: 09/885,720 Page 5

Art Unit: 3624

time of the invention would have been motivated to provide a greater opportunity for competing bidders to acquire good or service as well as provide the seller with a better price for the good or service. Thus to employ the notoriously old and well known teaching of multiple auction rounds found in Walker to Brown would be considered an obvious expedient within the ability of someone of ordinary skill in the art.
